

SOIL AMENDMENTS

You can amend your soil with organic matter such as:

- Sand
- Manure
- Composted mulch
 - GlenGrow
 - Composted kitchen scraps
- Seaweed products (i.e. kelp)
- Bone Meal
- Coffee grounds

Other products permissible to garden with:

- Biodegradable soap, salt, vinegar

NOT PERMITTED:

- Peat moss – for environmental reasons (it takes many years for nature to produce). A good alternative is coconut fibre – a faster renewable plant material – sold as a 'brick' at garden centres.
- Grass clippings where grass is fertilized with non-organic matter.

Absolutely NO chemical product or non-organic matter may be used:

- NO Miracle Gro products
- NO herbicides, pesticides, insecticides, etc.
